

When did your SAP® BI solution have its last MOT check?

Let Xoomworks take a look under the bonnet!

A Business Intelligence solution is now a crucial part of every successful business. It is a complex structure of technologies, applications and processes, fuelled by numerous, trans-regional data sources and business processes. Today, a high degree of flexibility and awareness is required to constantly realign decision making solutions to the rapid changes in the modern business world.

Xoomworks can help you to assess the maturity of your current SAP® BusinessObjects™ solution and ensure that it is performing to current organisational requirements while supporting your business, its teams and people effectively and efficiently.

Xoomworks ReVISION: the comprehensive maturity assessment of your BI investment

Following the completion of our diagnostics we will produce a thorough report that will:

- Provide a full understanding of the current system status
- Offer recommendations to convert immediate problems into quick wins
- Convey a vision that empowers your organisation to take the next step on your BI maturity curve
- Equip your people with the BI performance they need

ReVISION Methodology

Xoomworks ReVision is designed to identify, understand and address issues, challenges and risks in your BI strategy.

At Xoomworks we follow a modular approach to carefully examine your BI systems. Our team of highly experienced and certified SAP® BusinessObjects™ consultants will collaborate with you to conduct a thorough technical health check based on best practices and experience from implementing complex and global enterprise BI deployments with SAP® BusinessObjects™ solutions.

We question the optimal implementation of your business requirements, conduct an in-depth functional review and verify whether your chosen licence model satisfies your actual needs.

“For us they are our trusted technical experts, meeting deadlines and making things happen when everything is stacked against them.”

The Xoomworks ReVision assessment includes key elements such as:

Architecture and security	System performance, network, administration and configuration
Supported system components	Query design specifications – functional design, semantic layer design
Data model optimisation	Strategy and tool selection – match current and future functional specifications with appropriate toolset
Solution design aligned to business requirements	Economic utilisation and optimisation of licence agreement

Xoomworks ReVISION Deliverables

Upon completion of all the assessment modules, you will be provided with an in-depth report detailing all our findings, enhancement proposals and recommended next steps, including:

- **Review** – a comprehensive account of the current system status of your BI system
- **Adjust** – enhancement proposals and recommendations to address immediate problems and challenges
- **Vision** – a strategic road map outlining the steps to achieve the organisational vision for your BI solution

It is a blueprint to help you optimise the performance of your BI system, maximise your BI ROI and enhance your solutions to meet your existing and future strategic business objectives.

Partnering with Xoomworks

We lead the field in Business Intelligence. We have over 10 years' experience in SAP BusinessObjects™ and over 70% of our technical consultants have previously worked at SAP BusinessObjects™ in senior expert roles.
