

Xoomworks Accelerates Savings Through Better Sourcing

Sourcing is usually one of the most effective ways to deliver savings. But there is a significant difference between those that do it and those that do it well - top performers achieve four times more savings than average organisations.

For mid to large organisations, this is a difference of many millions, with savings typically lost through poor strategy, tendering, negotiations & compliance.

Xoomworks' sourcing services close this gap, whether you have an established procurement function, or are just starting on the savings delivery and cost reduction journey. Our sourcing offering allows for a tailored set of defined services for the areas where you need the most support, ranging from simple programmes of e-auctions to complex category management.

Different solutions based on how established your procurement is:

For mature Procurement Functions, we work with you using your existing sourcing platform and team to:

- ✓ Supplement your team so you can cover more ground
- ✓ Advise on event set-up and manage execution, delivering increased savings (this can be over 100% savings increase on what was previously being achieved)
- ✓ Coach, train and develop your in-house team

For growing procurement organisations earlier on the road of savings delivery, Xoomworks uses its lasta* cloud spend analytics and sourcing solution to:

- ✓ Complete data cleansing, consolidation and analysis
- ✓ Develop sourcing roadmaps
- ✓ Design and structure sourcing events
- ✓ Complete contract negotiation and move suppliers into business as usual
- ✓ Manage the execution of events, including supplier engagement, live monitoring and service desk support

“Xoomworks are down-to-earth, flexible and innovative. Their in-depth Procurement knowledge allowed us to achieve the goals we needed.”

Our Results

While we have saved our clients over £130m, it’s not always just about cost savings - the results must be sustainable.

Both our approach and our fees are structured to encourage this:

Our approach is collaborative meaning our expertise is transferred to your team, up skilling them and making them more self-sufficient.

As transactional experts, we also advise how to capture the savings, so they become more than just paper-based.

Our fees, unless specifically requested, are not based on percentage of savings achieved, meaning supplier assessment and award can objectively consider non-cost metrics.

There are a number of case studies on our website with greater detail from a small sample of our successes.

Industry Experience

As well as a broad range of categories, we work across most industry sectors, including:

- Pharmaceuticals
- Financial Services
- Retail
- Media & Entertainment
- Utilities
- Travel
- Hospitality
- Oil & Gas
- Public Sector
- Property
- Manufacturing
- Communications
- Professional Services
