

Xoomworks OneTeam Approach™

The Xoomworks OneTeam Approach™ enables fast-growing organisations to achieve superior value.

Challenge

In the field of today's rapidly-evolving technology development there is a true need for effective and efficient teams to bring solutions to market faster, using fewer resources. Trust should be an integral part of the methodology to reduce the time management spends overseeing a project. Internal teams should become free to deliver revenue generating projects with less time managing an external team, or re-working poorly delivered projects.

"The Xoomworks OneTeam Approach™'s outstanding performance for the Betfair Sportsbook integration projects has been achieved with a velocity, quality and commitment highly valuable to Betfair."

Paul Cutter, CTO, Paddy Power Betfair

Solution

We, at Xoomworks Technology, cultivate an inquisitive engineering culture within our organisation to produce cohesive, high performing and technically innovative teams that bring meaningful benefit to our clients.

The unique Xoomworks OneTeam Approach™ methodology deals with the critical elements of successful technology innovation and transformation projects, bringing forth cultural alignment and effective communication.

We recognise that each customer has different needs - we reflect that in our flexible engagement models and consultative approach to success.

We combine a passion for technology with a rigorous delivery approach that emphasises accountability, transparency and shared learning. Our clients range from start-ups exploring brand new technologies through to some of the world's largest enterprises, and in each case we tailor our work to provide the greatest possible values and showcase our shared strengths.

Be it through on-site, dedicated or distributed teams, our Xoomworks OneTeam Approach™ values are:

- ✓ Trust – We start from a position of trust and it forms the basis of all our relationships
- ✓ Pride – We are proud of our people and the work they do
- ✓ Caring – We care about our people and our clients and it reflects in the responsibility we all take for our work
- ✓ Legacy – Our legacy is important to us especially in terms of creating real benefit for our clients
- ✓ Freedom – We strive to give all our people the freedom to make an impact

We typically work with CFOs, CPOs and CIOs who want to get superior value from technology development projects. We help them control and create momentum in those projects, so that ultimately they can deliver on their promises to the Board.

Xoomworks Technology has the engagement tools that enable our specialists to collaborate with our customers efficiently, to gain business momentum and practical results from all their technology projects.

Xoomworks Technology Skill Matrix

<p>Quality Assurance: API Testing Automation testing Performance/Load testing Cucumber Manual testing Mobile testing Nunit Penetration testing Security testing Selenium TestNG Unit testing JMeter</p>	<p>Cloud: AWS Azure Google OpenStack</p>	<p>Backend: .NET Apache Ant Apex (Salesforce) ASPNET Atom C / C++ C# Chef Dekiscript Eclipse EJB Force.com Groovy Hibernate IntelliJ IDEA Java Java Swing Jboss JDBC Jenkins JSF JSP Junit Mercurial Objective-C Perl PHP Python REST Ruby Scala SOAP Spring Visual Basic</p>

Across our Xoomworks OneTeam pool of experts, we are recognised for our expertise in

- ✓ Quality Assurance
- ✓ Delivery & Tools
- ✓ Web / Cloud
- ✓ Frontend
- ✓ Backend
- ✓ Database
- ✓ Automation
- ✓ Project Management
- ✓ Business Analysis
- ✓ Technical Authoring

Our clients have a demand for high standards, both in technical skills and service delivery. With our Xoomworks OneTeam Approach™, the client teams and Xoomworks Technology's teams:

- collaborate on daily basis
- successfully exchange questions and feedback
- track the progress
- set milestones.

Benefits

Our partner organisations gain a complimentary suite of technical expertise and services to enhance their offering.

The Xoomworks OneTeam Approach™ removes the barriers between our team and your organization:

- ✓ Your problems are our problems and vice-versa
- ✓ Problems are dealt with as a single entity. The language of “us and them” is never used
- ✓ As well as excellent technical skills each of our consultants has an ability to connect with all levels of staff whilst listening to your needs
- ✓ Our expertise integrates with your technologies.

Our approach to business has shown us that there's quite a difference in our team of specialists. Our partner organisations treat the Xoomworks part of the team as one of their own for all elements of the relationship.

About Xoomworks Technology

Xoomworks Technology helps companies to solve their software development challenges cost effectively, by providing dedicated teams of near shore skilled resources. We can work directly as part of your team or can take full ownership of the development process. We have strong capability in open source, web, mobile and QA technologies and we have deep expertise in the travel, financial and gaming business sectors.
